## Summary

Results-driven Mobile Application Developer with having experience of 3 years and 5 months, specializing in Flutter, Android (Kotlin/Java), and Firebase. Proven ability to design and develop cross-platform applications with a focus on performance, scalability, and user experience. Experienced in implementing efficient state management using Provider and GetX, optimizing app responsiveness, and reducing unnecessary rebuilds. Successfully developed and delivered over 5 mobile apps across the Play Store and App Store, including projects with real-time features, in-app purchases, Firebase integration, and Payment Gateway(PayPal). Strong collaborator with experience working with international clients and delivering production-ready solutions from scratch.

### iGex Solutions – Ahmedabad, India

**Mobile Application Developer**

*January 2022 – Present*

- I started as a **Junior Android developer** during the final semester of my bachelor's degree, contributing to core Android development tasks and supporting senior developers.
- Upon graduation, I transitioned into a full-time role as a **Mobile Application Developer**, taking on end-to-end development responsibilities.
- Led a development team and successfully delivered multiple cross-platform mobile applications using **Flutter** and **native Android** technologies.
- Published **10+ applications** on **Google Play Store** and **Apple App Store**.
- Improved app performance and responsiveness by optimizing state management using Provider and GetX.
- Managed the **entire mobile app lifecycle** — from development, testing, and deployment to ensuring **100% compliance** with platform guidelines.
